Foreword

This brief history of the membership of the American Bandmasters Association honors both the Active Members and the Associate Member firms who, during the past 75 years, have been responsible for the growth of the organization into the pinnacle of excellence that it is today. It is a tribute to our Founder, Dr. Edwin Franko Goldman, who in 1929 set on a mission to enhance the interest in and quality of bands in America. It is a memorial, as well, to all those who have honored the profession by dedicating their efforts to bring high quality band music not only to America, but also the world. As an association we have survived, and indeed prospered, in our efforts to honor those who have brought distinction and honor to themselves and to our organization.

The names within this book are given as they were noted at the time of election to ABA. Other information on resignations, re-elections, and company representatives are also listed as of the time of election.

For information on current membership, please refer to the Membership Directory, which is published annually.
